

# SIGMA 7

## ZERO EMISSION, ZERO COMPROMISE

### THE SIGMA FAMILY

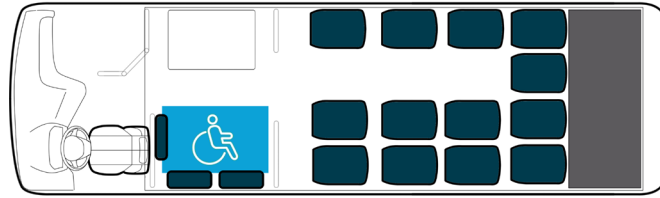

- British Design & Engineering
- Durability Tested at UTAC Millbrook
- Premium OEM parts
- Widths & Lengths for all operating environments
- Developed with customers in the UK & Europe
- Stainless Steel construction
- CATL Cobalt-free batteries

The Sigma family offers one of the largest ranges of low-floor battery-electric buses from any manufacturer in Europe.

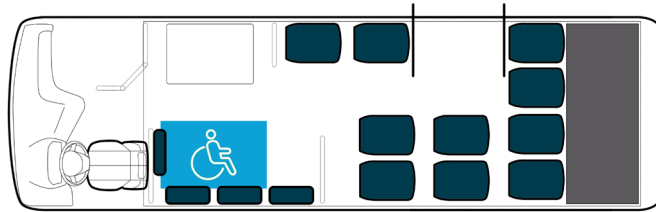

The range includes six models, from 7 to 12-metres, with GVWs from 9 to 19.5-tonnes, and the passenger capacity from 33 to 87.

Sigma represents a redefinition of public transport; a zero-emission, zero compromise solution, from a trusted, UK bus manufacturer.

## SIGMA 7 LOW FLOOR - ONE DOOR (Class I or A)

## SIGMA 7 LOW FLOOR - TWO DOOR (Class I or A)

### SIGMA 7 KEY FEATURES

|                        | 1 DOOR  | 2 DOOR                 |
|------------------------|---|------------------------|
| Single Door            | 15 seats / 18 standees                                | 13 seats / 20 standees |
| Overall Length (mm)    | 7140  |                        |
| Overall Width (mm)     | 2080  |                        |
| GVW (kgs)              | 9000  |                        |
| Construction           | Stainless Steel monocoque                             |                        |
| Battery Chemistry      | LFP (CATL)  |                        |
| Battery Capacity (kWh) | 127   |                        |
| Range (kms)            | Up to 250   |                        |
| Charging               | AC/DC or DC   |                        |
| Heating & Cooling      | Air Conditioning to cab & saloon<br>Heated windscreen |                        |
| Doors                  | Double Inward Glider                                  |                        |
| Accessibility          | Manual ramp   |                        |
| Tyre size              | 215/75 R17.5  |                        |
